FISCAL YEAR 1990

Jail and Detention Statistics and Information

The Detention Standards and Services Unit, Department of Corrections, monitors compliance with minimum standards for the physical condition of county jails, municipal jails, and county juvenile detention and shelter care facilities for the treatment of inmates with respect to their health and safety and security of the community. The Unit makes recommendations to such institutions to ensure compliance with the requirements of the minimum standards.

The Unit provides consultation services for the design, construction, and administration of detention facilities, makes studies and surveys of programs and administration of such facilities, inspects each institution at least once annually, and gives notice to the county board and sheriff or to corporate authorities of the municipality of any noncompliance with minimum standards. In addition to the sheriff, a copy of the county detention facility inspection report is forwarded to the county clerk, county board chairman, chief circuit judge, county resident judge, and state's attorney. Municipal jail inspection reports are forwarded to the chief of police, mayor, and city clerk.

The legal authority which governs the Unit's activities is contained in the Illinois Revised Statutes, Chapter 38 - Criminal Law and Procedure, Section 1003-15-2.

Appendix I reflects noncompliances with the Illinois County Jail Standards. Of 102 counties, nine did not operate a jail through FY90. There were 357 noncompliances and 206 recommendations to improve jail operations. Thirty-eight county jails and three work release centers had no noncompliances. Although 83 counties offered work release programs, only three operated their work release programs in accommodations separate from the primary jail complex.

The 357 noncompliances identified during the inspections of county jails were subdivided into two categories: administration, including operations and support services (163) and building and equipment (194). All recommendations cover the full spectrum of facility operations.

Noncompliances increased during FY90. The increase in most cases had a direct relationship to increased jail populations, resulting in significant overcrowding.

County jails continue to provide programs for detainees. Eighty-three counties have a work release program; 93 have counseling services that assist in family, religious, and/or employment problems; 93 provide counseling treatment for drug abuse and alcohol addiction; 92 offer library services; 93 offer religious services; and 50 have recreational programs that provide activities out of the cell or dayroom areas, either indoor or outdoor.

Appendix II reflects population statistical data, including those in the sentenced category, and the bed capacity of county jails. It is noted that Cook County figures include the county jail complex and the Maywood Branch facility. Jail capacities are based on a maximum of double occupancy. Capacity limitations are consistent with Illinois Revised Statutes which state that no more than two inmates may be housed in a single cell or detention room in county and municipal jails and

houses of corrections. The unit's jail monitoring continues to indicate that jail populations in Illinois reflect national trends in that most jails were overcrowded and/or attempting to program for detainees utilizing antiquated facilities.

Appendix III depicts both the noncompliances with the Municipal Jail and Lockup Standards and the population statistical data. As in county inspections, the 116 noncompliances identified were grouped into two categories: administration (55) and building and equipment (61). One hundred and eighty-six cities had no noncompliances. A total of 102 recommendations were offered with a view toward improving jail operations.

The number of active municipal jails fluctuated throughout the year. At the end of the reporting period, there were 286 active facilities. There were 401,485 persons (adults and juveniles) processed through Illinois municipal jails or lockups during this reporting period.

Appendix IV depicts the noncompliances noted during inspections of 14 independent county juvenile detention facilities. An independent facility is one which is not part of the county jail operation. The noncompliances with the County Juvenile Detention Standards were grouped into three categories: administration (25); building and equipment (33); and programs (1). Juvenile facilities experienced a significant increase in the number of noncompliances primarily due to a shortage of bedspace, resulting in overcrowding. The shortage of bedspace is at least partially a result of statutory changes related to the maximum lengths of time juveniles can be held in county jails or municipal lockups.

Appendix V reflects population statistical data for the county juvenile detention facilities. There were 19,274 juveniles held in the 14 county detention centers with an average daily detainee population of 672. The total number of juveniles housed in the 14 detention centers increased by 7%, and the average daily detainee population increased 10%.

In FY90, Unit personnel conducted 402 inspections; 69 special investigations; 85 unusual occurrence investigations; and 843 consultation and assistance visits.

JAILS IN FULL COMPLIANCE WITH
ILLINOIS COUNTY JAIL STANDARDS

Calhoun	Henderson	Morgan
Carroll	Jackson	Peoria
Champaign	Knox	Pike
Clark	Lee	Putnam
Clay	Logan	Rock Island
Crawford	Macon	Schuyler
DeKalb	Madison	Stark
DuPage	Marshall	Vermilion
